To the Listing Team, Binance Exchange

Dear Sir/Madam,

On behalf of the **DOA Project**, we hereby formally request the listing of our token **DOATokenV2** on Binance. DOATokenV2 is a **utility token deployed on the Polygon network**, designed to operate within the DOA ecosystem, enabling liquidity management, community participation, and access to advanced Dashboard functions.

We attach to this letter the **complete compliance package**, which includes:

- Official AML/KYC Policy.
- Utility Token Declaration.
- Terms of Use with explicit non-security clause.
- Official tokenlist with verified metadata and addresses.
- Community metrics and adoption data.
- External smart contract audit (pending delivery).
- Legal Opinion Letter issued by a specialized law firm (pending delivery).

Our commitment is to ensure **transparency, security, and international regulatory compliance**. DOATokenV2 does not constitute a security, and its function is strictly limited to the DOA ecosystem as a utility token.

We are confident that listing on **Binance** will expand the reach of our community and strengthen ecosystem liquidity, benefiting both users and the platform.

We remain at your disposal for any additional requirements and to coordinate the next steps to complete the listing process.

Sincerely,

Team DOA
